

Faster time-to-market. Reduced costs. Instant ROI.

Save time
Up to -50%

Save code
Up to -90%

Save money
Up to 88,000\$
per year/per developer

Average hourly rate
(company cost) mid-level
developer US: **90\$ /h**

Time savings with Felgo:
20h to 80h /month

Yearly savings:
90\$ x (20h to 80h) x 12

**22,000\$ to 88,000\$ /year &
developer**

How Felgo saves 20 - 80h per developer per month

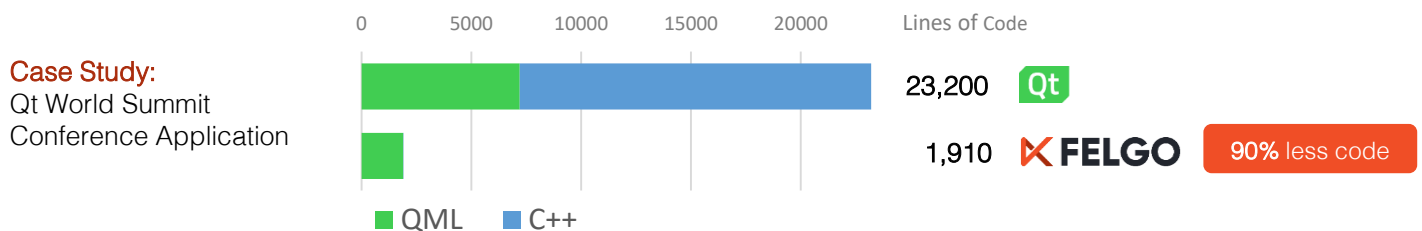

Felgo Professional Services

- ▶ Train your team to use Qt and Felgo more efficient, faster ramp-up getting productive
- ▶ Development services to support dev team build your product faster
- ▶ All services are available on-site and remote

Felgo Products

- ▶ 200+ Felgo APIs: faster development thanks to Felgo components
- ▶ Live & Hot Reload: higher efficiency thanks to rapid turnaround and testing cycles
- ▶ Felgo Cloud Builds - Qt CI/CD: save time with continuous integration and testing - streamlined development process

The Felgo framework allows you to save up to 90% of code compared to pure Qt projects. The result: less maintenance, fewer errors, faster development, reduced costs.

What Our Customers Say

"If I only knew about Felgo before! It would have saved us about 50% of the development time compared to plain Qt, and we would have been able to focus on the app itself, instead of recreating problem solutions that are already provided by Felgo."

Oliver Kuss

"I am using Felgo Live code reloading and my feedback is.. WOW! It is SO much easier!! So fast! I've several devices connected at once and it's worked perfectly. This is already speeding up my development massively."

Darren Brown

Make Better Qt Applications. Cut Dev Time.

Felgo SDK

200+ APIs on Top of Qt

- Responsive layout components for phone, tablet & Desktop
- Advanced controls and native navigation cross-platform
- Density Independence Support
- Display Cutout & Notch Support
- iOS, Android & Generic Style
- AR & AI/ML components
- Save up to 90% code compared to plain Qt!

Live & Hot Reload

- Instant reload of QML & JS code. Persisted State.
- Simultaneous testing on multiple devices
- Save hours on time-consuming deployment
- Develop for iOS from Windows and Linux
- Deploy OTA updates of your live application

Native Plugins & Device Features

- Push Notifications (OneSignal, Local)
- Analytics (Google, Firebase, Amplitude)
- Facebook
- Firebase (User Authentication, Realtime Database, Cloud Storage)
- Ads & In-app purchases (subscriptions)
- Beta Testing + Crash Reporting

Felgo Cloud Builds & Cloud Services

- Exclusive CI/CD for Qt and Felgo projects
- Automated builds for Mobile, Desktop & Embedded
- Integrate with your existing CI/CD
- Cut time for setup & maintenance of tools, Qt versions & dependencies
- Cut time to build updates & test versions
- Integrate with Git/SVN
- Hosted by Felgo or on-premise

Android and iOS Native App Integration

- Easy access to the native platform from QML, without C++ wrappers
- Write native code using JavaScript
- Native API access from QML
- Embed native views in QML
- Add Qt & Felgo views to existing Android and iOS applications
- Allows step-by-step migration of native apps to Qt
- Create native & Qt hybrid apps

Cross-Platform APIs & Tools are supported on MOBILE, DESKTOP, EMBEDDED & WEB

Felgo Professional Services

All services are offered on-site, remote or in our Vienna office. Available internationally.

Qt Development Services

- ▶ Mobile, Desktop & Embedded
- ▶ HMI and UI/UX development
- ▶ Standalone or support dev team
- ▶ Qt application optimization
- ▶ Cross-platform development

Qt Trainings & Workshops

- ▶ Qt & QML development
- ▶ Felgo development
- ▶ Cross-platform development
- ▶ HMI development
- ▶ Qt workflow optimizations
